Summary

Full Stack Developer with hands-on experience building scalable, high-performance web applications using React.js, Next.js, TypeScript, and Node.js. Experienced in real-time systems, AI-integrated platforms, and modern front-end architectures. Skilled in designing APIs, dashboards, and responsive interfaces with a strong focus on performance, scalability, and clean system design.

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Redux Toolkit, Tailwind CSS, GSAP, Three.js, WebGL
- **UI/UX Engineering:** Responsive Design, Cross-Browser Compatibility, Micro Frontend Architecture, Component-Driven Development, Accessibility (WCAG/ARIA), Progressive Web Apps (PWA)
- **Performance:** Performance Optimization, Code Splitting, Lazy Loading, Bundle Size Optimization, Web Vitals (LCP, FID, CLS), Server-Side Rendering (SSR), Static Site Generation (SSG)
- **Backend:** Node.js, Express.js, RESTful APIs, Middleware Design, Error Handling
- **Databases:** MongoDB, Mongoose, MySQL, PostgreSQL, Query Optimization, Database Indexing, Schema Design, Aggregation Pipelines
- **Media & File Handling:** ImageKit.io, Cloudinary, Multer, Image/Video Optimization, CDN Integration, File Upload Handling
- **Real-Time Systems:** WebSockets, Firebase
- **Authentication:** OAuth2, JWT, RBAC
- **Tools:** Git, Linux, Postman

Experience

SoundScapes – Landing Page Aug 2025 – Nov 2025

Freelance Client *HTML, CSS, JavaScript,*

- Developed a visually engaging landing page for SoundScapes, a digital platform focused on immersive audio experiences and community-driven sound creation.
- Built a modern, responsive website with a strong focus on user experience, smooth navigation, and polished visual storytelling.
- Designed and implemented key sections including the hero area, interactive audio controls, featured content sliders, and call-to-action elements to create an attractive and intuitive interface.
- Applied custom styling and animation using HTML, CSS, JavaScript, and Bootstrap to enhance interactivity.
- Strengthened skills in front-end development, UI/UX design, responsive web design, and creating polished interfaces aligned with branding and audience engagement goals.
- Worked with media integration, layout consistency, and cross-device compatibility to ensure a seamless experience across desktop and mobile screens.
- Maintained clean, maintainable code throughout the project to support future enhancements for the brand's growth journey.

Projects

AI Voice Booking System 2026

React.js, Node.js, MongoDB, Gemini API

- Built a full-duplex voice booking platform enabling real-time conversational interaction with an AI agent directly in the browser using the Gemini API.
- Engineered a low-latency backend pipeline to maintain real-time responsiveness during live voice conversations, minimizing round-trip delay between user speech and AI response.
- Implemented function/tool calling to let the AI agent trigger backend actions (e.g., checking availability, creating bookings) dynamically during conversation.
- Integrated rate limiting to control API usage, prevent abuse, and ensure stable performance under concurrent voice sessions.
- Applied background noise suppression to improve speech recognition accuracy and overall conversation quality.
- Designed MongoDB schema for storing bookings, conversation logs, and session state.

IMDB Review Application 2025

React.js, React Query, Reusable Component Architecture

- Built a movie review platform displaying up-to-date, real-time review data with a clean, scalable UI.
- Architected a reusable component library to ensure UI consistency and accelerate feature development across the application.
- Integrated React Query for efficient server-state management, caching, and background data synchronization.
- Optimized application performance to achieve a **99% Lighthouse score** on both desktop and mobile.
- Improved web accessibility to a **90%** score by following WCAG guidelines and semantic HTML practices.
- Achieved a **100% SEO score** through optimized meta tags, semantic markup, and structured data.

Education

Computer Science and Business Systems 2024 – 2028

Oriental Institute of Science and Technology, Bhopal
